CORNEAL TOPOGRAPHY & CATARACT PATIENTS

As part of today’s cataract evaluation you will receive a necessary test called corneal topography to appropriately evaluate the shape of your eye. **Corneal Topography is an essential part of an advanced cataract evaluation. Corneal Topography** provides your surgeon with detailed information about your eye and is an essential part of selecting the lens that will provide you with the best possible surgical outcomes.

“**Corneal Topography** is a non-invasive medical imaging test for mapping the surface curvature of the cornea, the outer structure of the eye. Since the cornea is normally responsible for some 70% of the eye’s refractive power, its topography is of critical importance in determining the quality of vision after cataract surgery.”

**Medicare, and most insurance plans, DO NOT COVER this fee as they consider the cost of the topography the responsibility of the patient.** The CPT code for Corneal Topography is 92025.

Today’s Fee for Topography: **$50.00**

This uncovered fee is due at the time of service and will be collected at check-out along with any other patient fees such as co-pays, deductibles or refraction charges currently due. Fees for the other, covered, tests performed during today’s visit will be submitted to your insurance carrier as a covered expense. Please note there may also be a refraction fee of $45.00 related to today’s visit.

By signing below you understand this test is not a covered service and agree to pay these charges along with any co-pays, co-insurances or deductibles due as dictated by your insurance plan.

Thank you for your understanding and best wishes for your future vision!
